## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Weber et al. (French Patent No. 2,596,334). Weber et al shows the use of a frame (4) with a flexible support element (3,5) attached thereto. A Bowden cable (8) is connected to the flexible supporting element by at least one spring (9) to allow a pair of side ends (see Fig. 2) to move toward one another. Weber et al. shows the use of a plurality of guide rods (3) connecting the flexible support element to the frame along with a plurality of sliding elements (7) connecting at least one of the flexible support element ends to the plurality of guide rods. Weber et al. further shows the use of a restoring spring (mounted to the grid (3) at the corners as shown in Fig. 1) along with a first (or upper) and second (or lower) transverse strut connected to the frame (Fig. 1). Regarding claim 19, the transverse struts are the wires of the grid (3) whereby the guide rods are attached thereto to form the grid.

## Allowable Subject Matter

3. Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable over the prior art made of record if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3636

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony D Barfield whose telephone number is 703-308-2158. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at §66-217-9197 (toll-free).
